Appendix B.	Changes in Boundaries, Names, etc., of administrative areas, 1950	461

EXPLANATORY NOTES

1. Changes in Presentation

(a) *Standard Regions, Conurbations, Density Summaries*

All figures given for regions relate to the Standard Regions whose constitution is set out on page viii. Earlier figures for Standard Regions have been given in the appendix tables to the Statistical Review for the years 1946 to 1949.

Six conurbation areas have been introduced in tables showing Standard Regions and in Table 19. For definition of "conurbation" and the list of conurbations, *see* Note 11 on page viii.

National density summaries relate to aggregates of (a) conurbations, and (b) areas outside the conurbations, including separately:—Urban Areas with (i) populations of 100,000 and over, (ii) populations of 50,000 and under 100,000, and (iii) populations under 50,000; and Rural Areas. For this purpose "Urban Areas" includes County Boroughs and Urban Districts as defined under the Local Government Acts, and "Rural Areas" covers the Rural Districts as defined under those Acts.

(b) *Order of Tables*

The tables in this volume have been renumbered to form the following sequences:—Populations—Tables 1 and 2; Serial mortality records—Tables 3–11; All areas—Table 12; Deaths by age—Tables 13–16; Cause analyses—Tables 17–23; Stillbirths and Infant Mortality—Tables 24–28; Infectious diseases—Tables 29–33; Weather—Tables 34–36. *See* Table of Contents on page ii.

(c) *Change in Classification*

Causes of death are now classified according to the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. *(Sixth Revision of the International List).

Rates and indices for earlier years have been adjusted as far as possible to give comparability with those for 1950. *See* Notes 4, 5 and 6 on pages vi and vii.

(d) *Deaths*

The deaths recorded are total deaths, i.e., including deaths of non-civilians registered in this country. Deaths of non-civilians are not now shown separately. *See* Note 3 on page vi.

(e) *Populations*

The populations shown for local areas are *home* populations. *See* Note 2 on page vi.

(f) *New and Revised Tables*

A new table (Table 19) has been introduced in this volume, showing causes of deaths at different age periods in the Conurbations and Density Summaries. Since this table includes all the relative details, Conurbations and Density Summaries are not distinguished in Table 20 (previously Table 24).

Table 18 (Table 25 in previous years), which gives more detail of cause than Table 17 (previously Table 21) for accidental deaths, is now in three sections—(a) Accidental poisoning by solid or liquid and other non-transport accidents according to place of occurrence, age, and whether at work; (b) Deaths from violent causes according to the nature of injury, sex and age; and (c) Nature of injury according to external cause.

The Tables designated 13A and 22 in previous years have been combined in Table 27 to show causes of death at different age-periods under 1 year of age

More detail of age groups is now shown in Tables 20 (previously 24), 26 (previously 13), and 17 (previously 21).

The table designated 15 in previous years has been replaced by a similar table (28) in this volume in which numbers of deaths are given in place of death rates. Illegitimate deaths under 1 year of age are also distinguished.

The meteorological tables (previously Tables 30-32) have been considerably revised, and are now numbered 34-36. The information has been supplied by the Meteorological Office and by Kew Observatory, Richmond.

2. Populations

The 1950 estimate of the total population of England and Wales shown in Table 1 includes members of its Armed Forces and Merchant Navy at home and overseas; it excludes the Armed Forces of Dominions, Colonies and Foreign Countries temporarily present in the country.

The national and local estimates of home populations (Tables 1, 2 and 12) comprise the resident civilian population, members of the Merchant Navy at home and overseas, and members of the Armed Forces stationed in the area.

3. Deaths

The deaths recorded in this volume are those registered in England and Wales. No distinction is made between deaths of civilians and deaths of non-civilians.

Except in Tables 16 and 23 the deaths recorded are those registered in the calendar period, the time lag between the date of occurrence and the date of registration being usually only a day or two. In Tables 16 and 23 deaths are classified by calendar month of occurrence.

In all tables deaths are classified according to the area of usual residence of the deceased.

4. Causes of Death

The classification of causes of death is that prescribed in the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948 (Sixth Revision of the International List), operating from the current year 1950 in accordance with international agreement. Violent deaths are generally classified according to the External Cause of Injury, but the new alternative method of classification by Nature of Injury (N codes) is also used in Tables, 7, 8, 18B, 18C, 19 and 27. The Abridged List used for separate areas in Table 20 is a modification of the International Abbreviated List and was adopted by the Registrar General in consultation with the Ministry of Health; it is extended by the Supplementary Abridged List in Table 21. The list used in Table 19 is designed so that it can be condensed into either the International Abbreviated List or the Abridged List of Table 20 (see note at 1(f)). Table 18C employs both of the alternative classifications for violent deaths in the International Intermediate List.

The new International Classification, which has been expanded to cover diseases and injuries as well as causes of death, differs considerably from the previous International Lists not only in scope but also in grouping of causes. In order to provide so far as possible continuity and comparability with past experience the following steps have therefore been taken:—

- (a) The 1949 experience has been completely reclassified according to the 1950 procedure and the revised figures used wherever 1949 references appear in this volume. (The full figures for 1949, based on the new Classification, by sex and age will be published in the Registrar General's Statistical Review of England and Wales for the two years 1948-1949, Text, Vol. 1, Medical.)
- (b) In the light of the dual classification experience for 1949, and of a limited amount of reclassification undertaken for earlier years, revised figures have been estimated so far as possible for each year 1940-1948, and have been used wherever references to these years appear in this volume. A series of footnotes has been appended to Table 7 explaining any limitations or qualifications attached to these estimates, and they should be borne in mind wherever the relative causes are distinguished in other tables.

Where more than one cause of death is mentioned on the Medical Certificate, the choice of the assigned cause is determined in the main from the statement of the certifier, and not by arbitrary rules of precedence. The practice in this respect is, in effect, the same as in years 1940 to 1949, and has now been adopted internationally.

5. Death Rates

The death rates for 1950 (except Infant Mortality and Maternal Mortality) are derived from the total deaths registered in this country and are based on the Home population, while those for 1940-1949 are derived from civilian deaths and populations (see note 2 on page vi). All death rates for years prior to 1950 have been revised so far as possible to the new method of classification.

The crude death rates for local areas in Table 12 (col. 12) are not validly comparable by reason of the fact that the areal populations on which they are based may be of widely differing sex-age constitutions. With a view to eliminating this element of variation, a comparability factor is provided in column 13 of the table for each area and this, when multiplied by the crude death rate of the area, produces an adjusted rate which may be regarded as comparable from a mortality point of view with the corresponding adjusted rate for any other area or with the crude death rate for England and Wales as a whole (where the comparability factor is unity). A guide to the relative incidence of mortality in different areas is provided by column 14 which expresses each local adjusted rate as a ratio of the national rate. For a fuller description of the comparability factor, reference should be made to the Statistical Review, Text 1938/1939, page 5.

Infant Mortality rates are based upon the combined births of the associated and preceding year to which they relate and Maternal Mortality rates upon live and still births occurring in the calendar year except in the case of deaths from Abortion which are based on the estimated numbers of women aged 15-44. (See also Note 7 below).

6. Standard Mortality Comparisons

The method of calculating the Comparative Mortality Index was explained in the Appendix to Part 1 of the Registrar General's Statistical Review for 1941. An alternative notation of the formula will be found on page vi of Part 1 of the Review for 1942. This method has been used for the C.M.I.'s in Tables 3 and 4. In Tables 5 and 9 C.M.I.'s worked on this basis have been adjusted so far as possible to the new method of classification. A certain amount of estimation is involved in this process of revision, and the resultant C.M.I.'s can only be regarded as approximate. For this reason they are given to two decimal places only instead of three as in the past.

7. Births and Birth Rates

The births recorded are those occurring in the calendar year.

In Table 12 births are allocated to the area of usual residence of the mother. Birth rates in this table have been calculated upon estimates of home populations.

The birth rate areal comparability factors and the ratios of the local adjusted birth rates to the national rate shown in Columns 9 and 10 of Table 12 serve a similar purpose to those shown for death rates, as explained in Note 5 above.

8. Notification of Infectious Diseases

Tables 29 and 31 (from the year 1944 only), and Tables 32 and 33 are based on notifications corrected for subsequent amendments of diagnosis by the Notifying Medical Practitioner or by the Medical Superintendent of the Infectious Diseases Hospital. Non-civilians are included throughout.

9. Significance Indication

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experiences may effect their significance.

10. Region

The constitution of the Standard Regions of England and Wales used in this Volume is as follows:—

<p>REGION I. <i>Northern.</i> Cumberland. Durham. Northumberland. Westmorland. Yorkshire, North Riding.</p> <p>REGION II. <i>East and West Riding.</i> Yorkshire, East Riding. Yorkshire, West Riding.</p> <p>REGION III. <i>North Midland.</i> Derbyshire, Part of¹ Leicestershire. Lincolnshire— Parts of Holland. Parts of Kesteven. Parts of Lindsey. Northamptonshire. Nottinghamshire. Peterborough, Soke of. Rutlandshire.</p>	<p>REGION IV. <i>Eastern.</i> Bedfordshire. Cambridgeshire. Ely, Isle of. Essex, Part of² Hertfordshire, Part of³ Huntingdonshire. Norfolk. Suffolk, East. Suffolk, West.</p> <p>REGION V. <i>London and South Eastern.</i> Essex, Part of⁴ Hertfordshire, Part of⁵ Kent. London Admin. County. Middlesex. Surrey. Sussex, East. Sussex, West.</p>	<p>REGION VI. <i>Southern.</i> Berkshire. Buckinghamshire. Dorsetshire. Oxfordshire. Southampton. Wight, Isle of.</p> <p>REGION VII. <i>South Western.</i> Cornwall. Devonshire. Gloucestershire. Somersetshire. Wiltshire.</p> <p>REGION VIII. <i>Wales I.</i> Brecknockshire. Carmarthenshire. Glamorganshire. Monmouthshire</p>	<p><i>Wales II</i> Anglesey. Caernarvonshire. Cardiganshire. Denbighshire. Flintshire. Merionethshire. Montgomeryshire. Pembrokeshire. Radnorshire.</p> <p>REGION IX. <i>Midland.</i> Herefordshire. Shropshire. Staffordshire. Warwickshire. Worcestershire.</p> <p>REGION X. <i>North Western.</i> Cheshire. Derbyshire, Part of.⁶ Lancashire.</p>

1. All except Buxton M.B., Glossop M.B., New Mills U.D., Whaley Bridge U.D., and Chapel en le Frith R.D.

2. All except East Ham C.B., West Ham C.B., Chingford M.B., Wanstead and Woodford M.B., Leyton M.B., Walthamstow M.B., Ilford M.B., Barking M.B., Dagenham M.B., Waltham Holy Cross U.D., and Chigwell U.D.

3. All except Barnet U.D., Bushey U.D., Cheshunt U.D., East Barnet U.D., and Elstree R.D.

4. All areas stated in 2 above.

5. All areas stated in 3 above.

6. All areas stated in 1 above.

11. Conurbations

The conurbation areas used in this volume were agreed by a interdepartmental committee, representing the principal Departments preparing statistics, as a means of securing uniformity and comparability in statistics published by Government Departments in the United Kingdom.

Conurbation is the word used to describe those areas of urban development where a number of separate towns have grown into each other and become linked by such factors as a common industrial or business interest, or a common centre of shopping, education, etc. The conurbations are each made up of a collection of complete local authority areas, constituted as follows:—

	<i>Durham</i>	<i>Tyneside</i>	<i>Northumberland</i>
Gateshead C.B.	Felling U.D.	Newcastle upon Tyne C.B.	Longbenton U.D.
South Shields C.B.	Hebburn U.D.	Tynemouth C.B.	Newburn U.D.
	Jarrow M.B.	Gosforth U.D.	Wallsend M.B.

TABLE 3.—Deaths, Death Rates, Mortality Comparisons and Infant Mortality, 1841-1950. } England and Wales.

Notes: (a) The Comparative Mortality Index expresses the mortality of each year or period as a ratio to that of 1938 adopted as the base, after adjustment for sex and age differences in the populations exposed to risk.
(b) The ratio of male to female mortality has likewise been adjusted for age differences in the male and female populations.
(c) See Explanatory notes on page vii.

See footnotes on first page of this Table.

TABLE 4.—Death Rates per 1,000 Living in Age Groups, Infant Mortality and Mortality Ratios, 1841-1950. } England and Wales.

Notes: (a) The Mortality Ratio expresses the all ages mortality of each year (or period) as a ratio to that of the preceding year (or period) after adjustment for sex and age differences in the populations exposed to risk.
(b) See Explanatory notes on page vii.

† Civilian mortality only in 1915-20 and from 3rd September, 1939 for males, and from 1st June, 1941 for females, to 1949 inclusive.

TABLE 7.—Deaths by Cause and Sex at All Ages, 1940-1950. } **England and Wales.**

(Excluding non-civilian males from 1st January, 1940, and females from 1st June, 1941, to 31st December, 1949 inclusive).

Note: (i) The following categories of the 1948 International Statistical Classification are not applicable to primary death tabulation and are therefore omitted from this table:—306, 308, 649, 775.

(ii) Although deaths in each year from 1949 inclusive were coded according to the 1948 International Statistical Classification, certain minor changes in coding practice were introduced between 1949 and 1950, and comparability of figures between those years is consequently affected. Categories principally affected are noted accordingly.

(iii) See Explanatory notes on page v.

E 963. Included in E970-E979 for these years.

E 964. Included in E980-E985 for these years.

E 990-E999. Includes E963 for these years.

TABLE 8.—Crude Death Rates by Sex from Certain Causes } England and Wales.
at All Ages to a Million Living, 1940-1950.

(1) Rates for years up to 1949 are based on civilian deaths and civilian populations. Rates from 1950 are based on total deaths and Home Populations. See *Explanatory notes on page v*.

(2) Footnotes to individual causes in Table 7 apply also to those causes in this table.

Final No.	Causes of Death		1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	1950

TABLE 9.—Comparative Mortality Indices (Base Year 1938) by Sex for Certain Causes of Death, 1940-1950. } **England and Wales.**

(1) The C.M.I. expresses each cause mortality (all ages) of each year as a ratio to that of 1938 adopted as a base, after adjustment for age differences in the populations exposed to risk. For years prior to 1950, including the base year 1938, mortality has been adjusted to the new (1948) method of classification to eliminate the effects of changing methods of cause assignment through those years. Owing to the degree of estimation thus involved, C.M.I.'s are shown to two decimal places only instead of three as in past years.

(2) In years up to 1949, C.M.I.'s are based on civilian death rates and age distribution.

(3) Footnotes to Table 7 for individual causes apply also to this table.

(4) See Explanatory notes on page v.

**TABLE 10.—Deaths under One Year of Age from } England and Wales.
Certain Causes, 1940-1950.**

Note: For years 1940-48 inclusive, deaths and rates classified in this table and in Table 11 according to the 1948 International Statistical Classification have been estimated from available material based on the 1938 International List in the light of experience gained in 1949, when both lists were employed. For those years, therefore, figures must be regarded as approximate.

See Explanatory notes on page v.

TABLE 13.—Deaths by Sex at each Year of Age } England and Wales.
(with Marital Condition), 1950.

Included in this Table are 389 cases (185 Males and 204 Females) in which the age of deceased was not definitely stated; these have been allocated to particular ages in accordance with the best available information and with due regard to the circumstances and cause of death in each case. The deaths of divorced men and women are included with the deaths of widowed.

See Explanatory notes on page vi.

In addition to these deaths, 80 male deaths which were registered in 1952, occurred in the Cresswell Colliery disaster on 26th September, 1950, at the following ages :—

25— 8	30— 3	35— 15	40— 13	45— 16	50— 13	55— 8	60—64 4
----------	----------	-----------	-----------	-----------	-----------	----------	------------

TABLE 17.—Causes of Death at Different Age-Periods, 1950, in England and Wales.

Notes: (a) Including deaths of non-civilians registered in England and Wales.

(b) The sequence of causes of death followed in this table is that of the detailed International Statistical Classification of Diseases, Injuries and Causes of Death (Sixth revision, 1948), including the classification by External Cause of Injury (E codes) for violent deaths. Each three-digit code is separately specified, except a few which are not applicable to primary death classification, and certain 4th-digit splits of general interest are also shown. Table 18 should be consulted for greater detail of violent deaths.

(c) Separate columns are not devoted to those causes to which, as a rule, few deaths are assigned. In order, however, to make the record complete, the classification numbers of such causes are printed as nearly as possible to the places where they would occur. The deaths, if any, from these causes are shown in footnotes in which the heavy-faced figures preceding the cause express the International Classification number, and the figures following it indicate the sex and age-group of the decedent, roman type for males and italic type for females. Thus 048, Unspecified forms of dysentery, 45, 65, 70, 65, 75 denotes that three male deaths (one in each age-group 45-, 65-, 70-) and two female deaths (one in age-group 65- and one in 75-) are assigned to this cause. A dash (—) indicates that no deaths are assigned.

See explanatory notes on page v.

TABLE 20.—Causes of Death by Sex, at Different Periods of Life, 1950, classified in accordance with the Abridged List (see statement below).

{ England and Wales, Standard Regions, London and Metropolitan Boroughs, County Boroughs.
{ Aggregates of other Urban and of Rural Districts in each Administrative County.

See Explanatory notes on page vi.

THE ABRIDGED LIST OF CAUSES OF DEATH adopted by the Registrar General in consultation with the Ministry of Health, and its relation to the detailed International Classification.

No.	Registrar General's Abridged List.	Corresponding number in the Detailed International Classification
1.	Tuberculosis, respiratory	001-008.
2.	Tuberculosis, other	010-019.
3.	Syphilitic disease	020-029.
4.	Diphtheria	055.
5.	Whooping cough	056.
6.	Meningococcal infections	057.
7.	Acute poliomyelitis	080.
8.	Measles	085.
9.	Other infective and parasitic diseases	030-054, 058-074, 081-084, 086-138.
10.	Malignant neoplasm, stomach	151.
11.	Malignant neoplasm, lung, bronchus	162, 163.
12.	Malignant neoplasm, breast	170.
13.	Malignant neoplasm, uterus	171-174.
14.	Other malignant and lymphatic neoplasms	140-150, 152-161, 164-165, 175-203, 205.
15.	Leukæmia, aleukæmia	204.
16.	Diabetes	260.
17.	Vascular lesions of nervous system	330-334.
18.	Coronary disease, angina	420.
19.	Hypertension with heart disease	440-443.
20.	Other heart disease	410-416, 421-434.
21.	Other circulatory disease	444-468.
22.	Influenza	480-483.
23.	Pneumonia	490-493.*
24.	Bronchitis	500-502.
25.	Other diseases of respiratory system	470-475, 510-527.
26.	Ulcer of stomach and duodenum	540, 541.
27.	Gastritis, enteritis and diarrhœa	543, 571, 572, 764.
28.	Nephritis and nephrosis	590-594.
29.	Hyperplasia of prostate	610.
30.	Pregnancy, childbirth, abortion	640-689.
31.	Congenital malformations	750-759.
32.	Other defined and ill-defined diseases	210-254, 270-326, 340-402, 530-539, 542, 544-570, 573-587, 600-609, 611-637, 690-749, 760-763, 765-795.
33.	Motor vehicle accidents	E810-835.
34.	All other accidents	E800-802, 840-962.
35.	Suicide	E963, 970-979.
36.	Homicide and operations of war	E964, 965, 980-999.

*NOTE: The group 490-493 (Pneumonia) does not include pneumonia deaths at ages under 4 weeks, which are assigned to 763 (Pneumonia of Newborn). From next year (1951) this group will be adjusted to include 763.

TABLE 20—*contd.*—England and Wales.

TABLE 21.—Causes of Death by Sex, 1950, classified in accordance with the Supplementary Abridged List (see statement below).

England and Wales, Standard Regions, Conurbations, London and Metropolitan Boroughs, County Boroughs and Administrative Counties.

See Explanatory notes on page vi.

THE SUPPLEMENTARY LIST OF SUBDIVISIONS OF THE ABRIDGED LIST OF CAUSES OF DEATH (see page 216) and its relation to the detailed International Classification.

<i>No.</i>	<i>Registrar General's Supplementary Abridged List.</i>	<i>Detailed International Classification No.</i>
2 (1)	Tuberculosis of meninges and nervous system	010
9 (1)	Typhoid fever	040
9 (2)	Scarlet fever	050
9 (3)	Streptococcal sore throat	051
9 (4)	Erysipelas, septicaemia, pyaemia	052, 053
9 (5)	Acute infectious encephalitis	082
9 (6)	Smallpox	084
9 (7)	Infectious hepatitis	092
14 (1)	Malignant neoplasm, mouth and pharynx ..	140-148
14 (2)	„ „ oesophagus	150
14 (3)	„ „ intestine and rectum ..	152-154
14 (4)	„ „ larynx	161
13 (1)	„ „ cervix uteri	171
14 (5)	Hodgkin's disease	201
14 (6)	Lymphosarcoma, reticulosarcoma	200
32 (1)	Thyrotoxicosis	252
32 (2)	Otitis media and mastoiditis	391-393
32 (3)	Rheumatic fever	400-402
20 (1)	Chronic rheumatic heart disease	410-416
21 (1)	Hypertension without mention of heart ..	444-447
32 (4)	Appendicitis	550-553
32 (5)	Intestinal obstruction and hernia	560, 561, 570
32 (6)	Cirrhosis of liver	581
32 (7)	Cholelithiasis, cholecystitis	584, 585
30 (1)	Maternal sepsis (not abortion)	640, 641, 681, 682, 684
30 (2)	Toxaemias of pregnancy and puerperium ..	642, 685, 686
30 (3)	Abortion	650-652
32 (8)	Birth injury	760, 761
32 (9)	Post-natal asphyxia and atelectasis	762
32 (10)	Pneumonia of newborn	763
32 (11)	Ophthalmia, pemphigus, sepsis of newborn ..	765-768
32 (12)	Haemolytic disease of newborn	770
32 (13)	Immaturity (without other disease peculiar to early infancy)	774, 776
32 (14)	Senility without psychosis	794
32 (15)	Ill-defined and unknown cause	780-789, 790-793, 795.

*The London figures include the following notification rates for Puerperal fever alone:—
1944—0.06, 1945—0.06, 1946—0.04, 1947—0.03, 1948—0.01, 1949—Nil, 1950—Nil.
† The rates in these years are based upon notifications finally corrected after amendment of diagnosis (except in Port Health Districts).

TABLE 30.—Seasonal Incidence of Certain Infectious } England and Wales.
Diseases, 1950 (including Non-Civilians).

Note.—The actual average weekly number of cases is shown at the foot of each column. The proportion of the notifications to this average taken as 100 is shown for each week : where the seasonal excess is more than 30 per cent. over the weekly average the proportionate figure is shown in heavy type.

See explanatory notes on page vii.

† By virtue of the Public Health Act, 1936, in all areas outside London A.C., conditions notifiable as puerperal fever prior to the 1st October, 1937, are, from that date, notifiable as and included with notifications of puerperal pyrexia. There were no cases of puerperal fever notified in London in 1950.

TABLE 34—Quarterly Air Temperature
Rainfall and Sunshine, 1950. } England and Wales.

Note.—The averages used for rainfall and rain-days are for the period 1881-1915, while those for temperature and sunshine are for 1906-1935.

District	Air Temperature			Rainfall		Sun- shine	Air Temperature			Rainfall		Sun- shine						
	Highest	Lowest	Difference from Average daily mean	Percentage of average	Number of days Difference from average	Percentage of Average	Highest	Lowest	Difference from Average daily mean	Percentage of Average	Number of days Difference from Average	Percentage of Average
